

Retention Playbook

Promotional sunset plan

- *Segment*
- *Customers who:*
- *Have Subscription Status = Yes*
- *Have Previous Purchases ≥ 20*
- *Belong to Gold,Platinum,Diomond Value_Tier*
- *Have LOW Dependency Score*
- *Why this segment?*
- *These customers are loyal and make repeat purchases even without relying heavily on promotions. Therefore, continuously offering discounts to them unnecessarily reduces profit margins.*
- *Trigger Behaviar*
- *More than 20 previous purchases.*
- *Active subscription.*
- *Low dependence on discounts and promo codes.*
- *Rollout Timming*
- *Reduce discount from 20% to 15% (month1)*
- *Reduce from 15% to 10% (month 2)*
- *Offer discounts only during seasonal campaigns*
- *Margin Impact*
- *Reducing discounts for these customers is expected to increase profit margins because revenue from loyal customers is maintained while promotional expenses decrease.*
- *Trade off*
- *A small percentage of price-sensitive customers may purchase less frequently, but overall profitability should improve.*

- *The ideal customer for the D2C nutrition brand is a highly satisfied and loyal subscriber aged 25–45 who makes frequent purchases, spends more than \$60 per order, belongs to the Gold Value Tier, and exhibits low dependency on promotions. These customers provide high lifetime value and strong retention. Marketing efforts should focus on acquiring and retaining similar customers through personalized recommendations, subscription benefits, and premium product offerings.*
